## NNS Breaks Ground for New Off-site Location

Newport News Shipbuilding leaders joined officials from the city of Newport News, real estate company Armada Hoffer and former NFL quarterback Aaron Brooks Tuesday, Feb. 13, to break ground on a new office building that will house hundreds of shipyard employees.

“This groundbreaking represents the next step in our business transformation,” said NNS President **Jennifer Boykin**. “This will be a center for innovation. It’s going to help us attract awesome new talent to the shipyard and to the Hampton Roads region.”

The four-story, 100,000-square-foot building will be located off-site near 30th Street and Jefferson Avenue. The top three floors will host about 600 NNS engineers, designers and planners who will use new technologies to help revolutionize the company’s future, according to Boykin.

## NNS Bidding Farewell to Propulsion Plant Mock-up

Newport News Shipbuilding’s *Nimitz*-class full-scale propulsion plant mock-up was an important tool in the development of shipbuilding technology used today.

“At the time it was built, the mock-up was a state of the art design technique. We went from composite drawings, to a mock-up facility and then ultimately to the digital tools they’re using today. I believe it was an important interim step,” said former shipbuilder **Bill Lee**, who earned the nickname “mock-up king” during his days at NNS in the 1960s and 1970s.

The mock-up – in an unassuming building near the 42nd Street Gate – will soon be history. Crews are working to demolish the deteriorating five-decade-old structure, which featured full-scale machinery space models made of sheet metal, plywood and cardboard. Designs had to be approved in the mock-up before ship construction could move forward.

## Black History Month Celebration is Thursday

The African American Shipbuilders Association (AASA) will host its annual Black History Month Celebration this week. For the past five years, **Roslyn Long** (E83/E30) has curated one of the event’s most popular attractions – an art show featuring the work of shipbuilders, their families and friends.

“So many shipbuilders have really fascinating backgrounds. The idea is to showcase the tremendous talent that we have here in the shipyard,” she said. “It’s so much fun, and it’s so gratifying to see how amazing the work is.”

## Preparing Your Group to Get the Most Out of the NNS Summer Internship

Production Planning and Scheduling Manager **Billy Blyth** (X47) would like to see the tags of baby boomers and millennials go away.

“I learned that they are damaging,” he said. Blyth has worked at Newport News Shipbuilding for nearly 35 years, but for the first time, he mentored an intern last summer. He said that the internship experience helped change his perspective on generational stereotypes.

He and his group mentored José Rolando Solórzano González last summer. González is an engineering student attending the University of Puerto Rico. Blyth was nervous to have an intern in his group, thinking it would slow down the everyday work routine. Blyth was not the only one who was nervous; González was worried that he wouldn't fit in.

“Before I left to Newport News, I had two things in mind that made me nervous,” he said. “The first one was if I would be able to adapt to my working place, and the second one was if I would be able to successfully satisfy my mentors. I was afraid to feel out of the group because I was different.”

Blyth and his group welcomed González. “Having an intern like José was a chance to mentor or be a big brother to someone who is new,” said Production Planner and Scheduler **Bruce Green** (X47). “You have to realize that they are in an environment that they've never been in. They don't know what to expect. They need someone to welcome them, to take them under their wing and to show them, mentor them and let them know you have their back,” he said. Green added that interns have to want to learn everything about the business.

CONTINUED ON PG 4

## Black History Month: Leon Reynolds Jr.

*February is Black History Month. The theme for this year's Inclusion and Diversity (I&D) monthly recognition campaign is “Unite Our Voices by Speaking Together.” As part of the campaign, four employees will be featured during each recognition month – two from within the featured demographic and two outside of it. Employees will share personal stories, insight and perspectives on what the month means to them. Features will be published in Currents, the NNS to Go app, MyNNS and HII social media channels.*

“I can't” isn't an option for **Leon Reynolds Jr.** (O25) – it never has been and never will be.

“I was raised to believe ‘I can,’” he said. “To this day, that belief is still very much engrained within me in everything I do. My inspiration stems from my father. Raised in Mississippi in the 1920s, he wasn't afforded many opportunities. With an eighth grade education, he successfully supported our family of six and became one of the first black men in New York City to become a brick layer. Never complaining about the lack of opportunities, my father always strived for success and saw the positive in every situation.”

Today, Reynolds still looks up to his 98-year-old father, while also leading by example for his children, including his son who is currently an apprentice at Newport News Shipbuilding. “I try to be a good role model not only to them, but to everyone around

me,” he said. “By showing people ‘they can,’ I hope to empower and guide them toward success.”

As one of eight founding members and the second president of the African American Shipbuilders Association (AASA), Reynolds is proud to have played a major role in forming an organization that will provide community outreach and leadership opportunities for shipbuilders interested in advancing their career.

“When the people around you succeed – you succeed,” Reynolds said. “From my perspective, there's a large sense of engagement when African Americans see people who look like them in pivotal positions within the company. My hope is that NNS will continue to value inclusion and diversity – and that the number of minorities in key leadership roles will continue to increase in the future. It's also my hope that AASA will be a foundation for creating some of those leaders.”

He added, “Here at the shipyard, I feel like I'm part of something much greater than myself. The work we do is so important – to both our country and the entire world – any way we can better ourselves, the better off we'll be.”

Reynolds is a big proponent of diversity of thought. “People from different backgrounds will naturally have different visions, thoughts and approaches getting things done,” he

said. “The more inclusive we become and through deployment of connectedness, we will become a stronger, more intelligent workforce – we'll be the best team possible.”

In regards to Black History Month, Reynolds believes, “February is an opportunity to reflect on how far we've come and to recognize that more work still lies ahead. We must keep moving forward and continue paving the way for the next generation. Simply put, black history is American history – which should be celebrated by everyone.”

View Reynolds' poster on MyNNS. Employees interested in participating in this year's I&D campaign are encouraged to visit [nns.huntingtoningalls.com/id-campaign-2018](https://nns.huntingtoningalls.com/id-campaign-2018).

## Apprentice School Wrestlers Making a Mark

Two Apprentice School wrestlers – **Colton Messick** (X32) and **Chad Simmons** (X36) – are ranked No. 1 in their respective weight classes, according to the National Collegiate Wrestling Association (NCWA).

Messick – a 125-pound sophomore – said it was a great feeling to learn he was ranked No. 1. “It motivated me to come in here and work even harder,” he said.

Like all Apprentice School athletes, the two have to balance work, academics and athletics. “It’s difficult at times, but it helps to have teammates and coaches who do it along with you,” said Simmons, a 157-pound junior. “When I got here, the coaches believed in me and molded me into a better worker and wrestler. They steered me in the right direction.”

Simmons said wrestling positively impacts his work as a shipbuilder. “When you have to do physical labor on a daily basis,

it definitely helps to be in shape from wrestling,” he said. “Mental toughness is another benefit.”

Messick said wrestling is helping him progress toward his goal of becoming a foreman. “I take the leadership skills I get from wrestling to the waterfront,” he said.

Simmons and Messick aren’t the only Apprentice School wrestlers enjoying a successful season. The entire team is having one of its best seasons in years, recently winning the USCAA National Invitational at Penn State University earlier this month for the first time since 2014.

“I could not be more proud. All of my wrestlers understand that success comes at a cost. That cost is effort, sweat, blood and tears,” said Wrestling Head Coach **Micah Amrozowicz** (X91). “They all understand that to be successful you have to outwork the person beside you. You have to outwork your

Colton Messick, left, and Chad Simmons are among The Apprentice School's standout wrestlers. Photo by Ashley Cowan

opponent, and they can carry this mindset with them through life and in their career. It is an exciting season, and we look forward to showcasing our hard work and preparation in the upcoming postseason competition.”

The team is in action this weekend at the NCWA Mid-Atlantic Conference.

## NNS Bidding Farewell to Propulsion Plant Mock-up

CONTINUED FROM PG 1

“It was an engineering and design tool that outlived its purpose,” said **Scott Bunting** (E83). “We quit updating it in the 1990s because we could no longer represent the 10 *Nimitz*-class ships in one building.”

Lee has vivid memories of his time working on and in the mock-up, including stressful visits from Adm. Hyman G. Rickover, who is considered the “father of the nuclear Navy.” “It was exciting because we never knew what he was going to say or do,” Lee said. “He inspired us to develop a philosophy of design not just to meet the specifications, but to make it as easy to build, operate and maintain shipboard systems as we possibly could.”

The mock-up’s construction coincided with the construction of USS *Nimitz* (CVN 68). “The *Nimitz* design was ultimately replicated 10 times. There were some changes along the way, but the fundamental design proved sound and was worth all the time, effort and money that it took,” Lee said.

Designer **Bonnie Butterbaugh** (E83) started working in the mock-up in 1987. “At that time, the doors had been shut for 10 years. My task was to bring it up to date, and now I’m ripping it down,” she said as crews tore into the building. “It was a very good learning and teaching tool for me. There isn’t a place in this building I haven’t been.”

**Cal Forrest**, who now works for Huntington Ingalls Industries' Technical Solutions Division, spent time working in the mock-up in the late 1960s and 1970s. “I’ve been on different kinds of ships, and this was a good design. It was really well thought out,” he said.

The “mock-up king” said he’s too pragmatic to be sad about the mock-up’s demise. “It served its purpose. As I understand it, they’re not using it and it has deteriorated. It’s time for it to go,” Lee said.

Demolition is expected to be complete in March, and site work should wrap up by the end of April. Capacity Planning is evaluating the soon-to-be vacant space for future use.

## Spring 2018 Night School Registration Underway

Spring 2018 Night School Registration is underway. All classes are scheduled to begin the week of April 2 and continue through June 2. The application deadline is March 9. For further information and to view a list of classes and registration information, visit the Night School website, the programs tab on the Apprentice School website or the NNS to Go app. For questions, contact **Shirley Smith-King** (O22) at 688-8608.

## Attend Homer L. Ferguson Lecture

Learn about Homer L. Ferguson's accomplishments as president of Newport News Shipbuilding through both world wars during a lecture from 3:30 until 4:30 p.m. Saturday, Feb. 24, in The Mariners' Museum and Park's Huntington Room.

The event is free for museum members and \$5 for guests. Doors open at 3 p.m.

## Preparing Your Group to Get the Most Out of the NNS Summer Internship

CONTINUED FROM PG 2

Production Planner and Scheduler **Leonard Mitchell** (X47) also mentored González, giving him projects. “We treat interns like regular co-workers. Even though we have different backgrounds and upbringings, my group is like a big family,” Mitchell said. González said all members of the group left a great impression on him. “Most of my co-workers were interested in learning about my hometown, and they became my friends,” he said.

González not only felt support from the group during his internship, but shortly after during a natural disaster in Puerto Rico. Hurricane Maria hit the island in September 2017 as a Category 4 storm causing widespread devastation. González and his family survived the deadly hurricane, but they were in need of water and electricity. Blyth’s group reached out to González, asking if he needed any help. “We were really worried about him because we couldn’t get in contact with him for several days.” Blyth said. “I think it was about 10 days until we found out that he was OK.”

Green said the group tried to figure out every day what was going on. “We were so relieved when we first heard his voice on the phone,” he said.

González said he appreciated the group reaching out to make sure he and his family were safe. He added that he wants to return for the 2018 Summer Internship Program. After graduating from college, he hopes to apply for a full-time job. “Every day I thank God for crossing paths for the ladies and gentlemen that I met at Newport News Shipbuilding,” he said. “I feel that this is my future, working with them.”

The application deadline for prospective summer interns has closed for this year. NNS is currently extending offers to internship candidates.

Watch an internship testimony on MyNNS.

## Black History Month Celebration is Thursday

CONTINUED FROM PG 1

Long – a designer and technical writer at Newport News Shipbuilding by day – also is an artist. She said the idea for the show came about when she learned many fellow shipbuilders also had creative outlets outside of work. “Shipbuilding is intense. To be able to do this, you have to have some kind of outlet,” she said.

The art show has grown each year, and Long said all NNS employees are welcome to show their work. There are no restrictions on theme or medium. “If you’re an artist and have something to show, this is an opportunity. You don’t have to be black. You don’t have to be a member of AASA,” she said.

The Black History Month Celebration is from 4 until 7 p.m. Thursday, Feb. 22, in the James River Room in Bldg. 520-6. The theme of this year’s event is “The Strength of Unity,” and Hampton Mayor Donnie Tuck will be the guest speaker.

For more information, contact **William Bond** (E83) at 380-3897, **Robin Lee** (O53) at 688-6059 or visit AASA’s website.

**Andrea Lees, AJ Hunter and Emily Frantz** volunteer at Rensselaer Polytechnic Institute's Exploring Engineering Day.

## KSO Volunteers Help Students Explore Engineering

Employees from KSO Engineering (E91) in New York volunteered at Rensselaer Polytechnic Institute's Exploring Engineering Day Feb. 10.

“This was an awesome opportunity to get local kids interested and involved in science, technology, engineering and math (STEM) fields,” said **Andrea Lees** (E91), one of the employees at Newport News Shipbuilding's Kesselring Site who volunteered at the event. “NNS provides a very unique perspective of engineering since we are one of the few companies in our field, so it was great to get to introduce so many children and parents into the world of shipbuilding.”

About 300 students from third through sixth grades and their parents attended the event. At the NNS table, families built and tested boats using only duct tape as volunteers explained the scientific method and basic engineering principles. Students then tested their boats in tubs of fresh and salt water, where volunteers showed how the density of the water affected how much weight the boats could hold.

“I was amazed to see how many kids already understood the idea of how density affects a boat’s ability to hold weight and how dedicated they were to building the best ships,” Lees said. “I opted to volunteer for this event because we (NNS-Kesselring) always hear stories about how the home shipyard reaches out to the community in Virginia to positively influence families and schools. It was really incredible to be able to have a similar impact in our own community in New York.”

## AROUND THE YARD

### WiSE Woman Monthly Recognition Program

WiSE Woman is a recognition program that highlights the extraordinary efforts of shipbuilders. It provides Women in Shipbuilding Enterprise (WiSE) with the opportunity to tell the stories of the women shipbuilders who define Newport News Shipbuilding's values and inspire others. Do you know of someone who has inspired you professionally or personally? It takes just a moment to complete the WiSE Woman nomination form. Recognition programs work best when people see the good in others and acknowledge it. Nominate a shipbuilder today.

For more information, contact **Janice S. Boone** (E16) at 380-3842 or go to the WiSE website.

Thirty-four shipbuilders were honored for earning master's degrees in highly technical engineering fields. Photo by John Whalen

### NNS Honors Master's Graduates

An evening dinner recognition event was held Jan. 31 to honor 34 shipbuilders who recently earned master's degrees in highly technical engineering fields.

The graduates are the first from three programs of study as part of Newport News Shipbuilding's Technical Graduate Partnerships with The George Washington University, Virginia Commonwealth University and Old Dominion University. A second cohort is in progress.

NNS formed partnerships with the three universities for teams of employees to complete three-year master's degree programs in technical engineering fields to grow the company's bench strength.

**Mike Reilley**, NNS' chief engineer, hosted the event. **Charles Southall**, vice president of Engineering and Design, and **Mary Cullen**, vice president of Nuclear Propulsion, provided remarks. Dr. John Amy, of NAVSEA's Office of Naval Research was the guest speaker.

### Code of Ethics and Business Conduct Updated

Huntington Ingalls Industries' Code of Ethics and Business Conduct was updated in December 2017. Employees should use the booklet as a guide and reference to proper business conduct behaviors and practices. See a list of updates on MyNNS.

### Equality Virginia's Deputy Director to Speak at VASCIC

Shipbuilders Together Realizing Inclusion, Diversity and Equality (STRIDE) is hosting Vee Lamneck, deputy director of Equality Virginia, for a talk at 4:30 p.m. March 28 in the VASCIC auditorium. All shipbuilders are welcome to attend.

NNS President **Jennifer Boykin**, Armada Hoffer Chief Investment Officer **Eric Smith** and Newport News Mayor **McKinley Price** watch as **Aaron Brooks** speaks at the groundbreaking ceremony. Photo by **Matt Hildreth**

### NNS Breaks Ground for New Off-site Location

CONTINUED FROM PG 1

The building's first floor will be home to a workforce development center and space the city's Economic Development Authority will lease for science, technology, engineering and math (STEM) initiatives for local students.

"This will allow us to grow and keep that talent in this region. I'm happy we're able to continue the partnership we have with the community," Boykin said. "We believe very strongly in our legacy of not just being a good shipbuilding company, but a great community partner."

The building is part of the Brooks Crossing development, a project spearheaded by Brooks – a Newport News native – to help revitalize the city's Southeast community. "Having a company like Huntington Ingalls Industries is very special to this development," he said. "Thank you for your unwavering commitment to this area."

Newport News Mayor McKinley Price said the "excitement is contagious." "Great things are truly happening in Newport News, and they are happening right here in the Southeast community," he said.

Armada Hoffer officials expect to complete construction next year. Watch a video of Boykin's remarks from the groundbreaking ceremony on MyNNS.

# DATEBOOK

## FEBRUARY 22

Join Women in Shipbuilding Enterprise (WiSE) for the annual GoRed for Women event at 6 p.m. in the new Apprentice School gym. The event will dive deep into the issues surrounding women's heart health with the health professionals from QuadMed. **Charles Southall**, vice president of Engineering and Design, will share a personal story. Immediately following the event, join WiSE in supporting the Lady Builders basketball team as it takes on Mid-Atlantic Christian University for senior night. To RSVP, contact **Tatayanna Cox-Taylor** (X51) at 534-4840.

## FEBRUARY 24

The graduation ceremony for The Apprentice School's Class of 2017 will be held at 1 p.m. at Liberty Baptist Church, located at 1021 Big Bethel Rd. in Hampton. No tickets are required to attend. Attire is business casual.

## FEBRUARY 27

L.E.A.R.N. will host an after-work presentation with **Michael Lempke**, president of the Nuclear and Environmental Group at Huntington Ingalls Industries' Technical Solutions division, from 4:30 to 6 p.m. in the VASCIC auditorium. Lempke will discuss his group's work for the Department of Energy (DOE), along with exciting opportunities for engineers, program managers and business professionals at DOE sites across the country. The event is open to all employees by reservation only. Sign up on the L.E.A.R.N. SharePoint site. For questions, contact **Tanika Vasquez** (O24) at 688-7916 or email [LEARN@hii-nns.com](mailto:LEARN@hii-nns.com).

## FEBRUARY 27

Attend a free "Money and Relationships" class from SmartPath. Classes are offered from 6-6:45 a.m. in Bldg. 1744-6 Operations Conference Room, from noon-1 p.m. in Bldg. 520-6 Huntington Room and from 4:30-5:30 p.m. in Bldg. 520-6 Huntington Room. Email [BeWell@hii-co.com](mailto:BeWell@hii-co.com) by Feb. 23 with your preferred class time to register or ask your foreman to register you. Space is limited. Refreshments will be provided. Management-approved PTO/Flex is required during scheduled work hours.

## MARCH 8

The Society of Manufacturing Engineers will sponsor a tour of Amadas Industries Inc., located at 1100 Holland Rd. in Suffolk, from 4:30 to 6:30 p.m. *Amadas has two facilities about four miles apart. The tour will begin at the above address, and participants will then travel to the other location.* There is no cost for the tour. Dinner at George's Steakhouse will follow. Individuals are responsible for their meals. To RSVP or for more information, contact **John Edwards** (E84) at 876-8386.

## MARCH 9

The Apprentice Alumni Association will host its annual banquet honoring the Class of 1968 at the Newport News Marriott at City Center. A social hour will begin at 5:30 p.m. with dinner and program commencing at 7 p.m. Anyone can purchase tickets for \$40 through **Sally Krystyn** (O22), Teagle Insurance or alumni officers and delegates. For more information, contact **Sarah Gentry** (K45) at 329-2449.

## MARCH 17

The Apprentice School Student Association will host a trip to watch the NHL's Carolina Hurricanes take on the Philadelphia Flyers in Raleigh, North Carolina. The bus leaves the Apprentice School Athletic Field at noon. One ticket is \$25, and two are \$40 (limit two tickets per apprentice). Alumni and staff tickets are available Feb. 19 and additional tickets are available Feb. 26. To purchase tickets, visit [apprenticestudents.com](http://apprenticestudents.com), click on event, and click on Eventbrite link.

## MARCH 17-18

Newport News Shipbuilding is a sponsor of the *FIRST* Robotics Chesapeake District Hampton Roads Competition for the third year in a row. The event will be held at Churchland High School March 17 and 18 from 8:30 a.m. to 5 p.m. each day. Admission is free, and families are welcome. View the flier for more information. If you are interested in mentoring a team leading up to the event, contact **Chris Brown** (O35) at 688-7897 as soon as possible. If you would like to volunteer for the event, contact **Lewis Fisher** (E25) at 688-4761.

## MARCH 23-24

NNS's IT Division and Asian Shipbuilders Including All Nationalities (ASIAN) are teaming up with Christopher Newport University to host a Disrupt-a-thon. This event will foster collaboration between NNS employees and CNU students with the goal of leveraging technology to transform the workplace. All shipbuilders are encouraged to participate. The event will kick off at 5 p.m. Friday, March 23 and continue through Saturday, March 24. For more information and to register for the event, visit [disruptathon2018.eventbrite.com](http://disruptathon2018.eventbrite.com).

## MARCH 24

The Apprentice School Student Association will host its annual Easter Egg Hunt from 10 a.m. until noon at First Presbyterian Church, 514 S. Armistead Ave. in Hampton. Tickets for children 12 and under are free. Tickets for adults (13 and up) are \$1. Limit six tickets per apprentice. Tickets are required for all attendees. Alumni and staff tickets are available March 5, and additional tickets are available March 12. To purchase tickets, visit [apprenticestudents.com](http://apprenticestudents.com), click on event, and click on Eventbrite link.

## MAY 19

The 2018 NNS Submarine Program Golf Classic will be held at 1 p.m. at Cypress Creek Golfer's Club. This is a four-person, Captain's Choice tournament. The cost is \$80 per person (\$320 per team). Tournament proceeds will benefit the nonprofit Stop Soldier Suicide and the Virginia Peninsula Foodbank. For more information, contact **Johnny Mintz** (X67) at 688-5031 or 880-8965.
