

Indiana (SSN 789) Completes Initial Sea Trials

The newest *Virginia*-class submarine, *Indiana* (SSN 789), successfully completed its initial sea trials Friday, May 25.

The initial round of sea trials, known as alpha trials, provides an opportunity to test all systems and components. It includes submerging for the first time and high-speed maneuvers while on the surface and submerged.

“Sea trials is a significant milestone and the first major test of submarines' capabilities at sea,” said **Dave Bolcar**, vice president of Submarine Construction. “We are pleased with how *Indiana*

performed and look forward to continuing our testing program before we deliver the boat to the U.S. Navy later this year.”

Construction of *Indiana* began in 2012. The boat – the 16th *Virginia*-class submarine built as part of the teaming partnership between Newport News Shipbuilding and General Dynamics Electric Boat – was christened in April 2017.

Watch a highlights video of *Indiana*'s sea trials on MyNNS and the NNS to Go app to hear from some of the shipbuilders who worked on the boat.

Photo by **John Whalen**

A shipbuilder uses a new T-handle device.

Innovation on the Deckplate

Each day, on every deckplate and in every shop, innovation happens across Newport News Shipbuilding. Whether solving a

challenge in engineering, design or on the waterfront, shipbuilders are constantly creating new solutions to make their work safer, faster and smarter.

Many of NNS' most successful innovations began as challenges that were solved with simplicity. Shipbuilders encountered a challenge during the removal of gas service valves on "A-frame" gas manifolds in the North Gas Yard No. 6. Due to the manifold design, refurbishing or replacing valves required an awkward hand grip that resulted in hand and finger injuries.

In addition, removing the gas service manifold valves required strenuous manipulation, traditionally performed using a hand-tool with cramped access and poor ergonomics. With an increase in repetitive motion injuries occurring as shipbuilders pull and replace the gas service valves, O46 Foreman **Michele Affolter** and the O46 Ergo Task Team decided something needed to be

done. Affolter challenged one craftsman to improve the situation.

In just a few days, Pipefitter **Rufus "Buck" Sipple** (O46) developed a prototype "T-handle" device that allows easier hand-wheel rotation using a wrench affixed to a slip-on hand-wheel-cover. Shipbuilders welcomed the new tool. "It has greatly reduced strain on the upper body," said Pipefitter **Aaron Johnson** (O46).

"The gas service valve tool reduces the risk for hand injury and also makes the process of refurbishing 'A-frames' more efficient," said Pipefitter **Reggie Moore** (O46).

This simple, yet effective solution went through months of modifications and testing for strength and replication and is now available and in use within Plant Operations (O46). The department is currently working to make the gas farm T-handles available for check out in the tool room.

Asian-Pacific American Heritage Month: Paula Young

May is Asian-Pacific American Heritage Month. The theme for this year's Inclusion and Diversity (I&D) monthly recognition campaign is "Unite Our Voices by Speaking Together." As part of the campaign, four employees will be featured during each recognition month – two from within the featured demographic and two outside of it. Employees will share personal stories, insight and perspectives on what the month means to them. Features will be published in Currents, the NNS to Go app, MyNNS and HII social media channels.

As the nation celebrates Asian-Pacific Heritage Month in May, **Paula Young** (O68) reflects on her experience as a member of the Asian Shipbuilders Including All Nationalities (ASIAN) employee resource group (ERG) at Newport News Shipbuilding.

"As a member of the ASIAN employee resource group, I have learned a great deal about the customs and traditions of Asian cultures. I've also made many new friends who have given me even more insight. Inclusion and diversity are so important because they take away prejudices and allow us to get to know – and learn from

– one another. You ultimately realize how different, but similar we all are, no matter our background," she said.

In her three decades at NNS, Young has witnessed a lot of positive change – especially in terms of inclusion and diversity. One change in particular that stands out is the development of various ERGs, which help connect and engage employees from across the company.

In fact, Young – a planner in Dimensional Control at NNS – is such a believer in the company's ERGs that she joined them all.

Participating in events with ASIAN provides opportunities to learn, network with fellow shipbuilders and NNS leaders and perform community service work. "I've had so many opportunities here in the shipyard, and that's why I do all of the things that I do. ERGs like ASIAN give you a broader view of the shipyard and your coworkers, while also allowing you to give back," Young said.

She encourages all shipbuilders to explore ERGs and take the time to learn about different cultures. "We should all be

willing to open our minds and learn new things." Young said. "It is a truly rewarding experience."

View Young's poster on MyNNS. Employees interested in participating in this year's I&D campaign should visit nns.huntingtoningalls.com/id-campaign-2018.

The Foundry team begins the pour for a *John F. Kennedy* (CVN79) steel elevator guide rail. Photo by John Whalen

Foundry Sets New Record

Shipbuilders in Newport News Shipbuilding's Foundry recently shattered a record when they shipped a huge casting for *John F. Kennedy* (CVN 79) after only 97 days of manufacturing.

That's a substantial improvement from the previous standard of 400 days to manufacture the 22-ton elevator guide rail casting. The time and cost savings are the result of process modifications and attention to detail by shipbuilders at every phase of development. "I am proud of the entire team's focus on providing a quality product," said Foundry General Foreman **Kevin Forrest**.

"It's all about preparation," said **Marvin Major** (A572), a member of the mold crew. "I make sure all my material is in line, because there are strict time limits on using the sand. Once we start, we can't stop."

Elevator guide rails play an important role in moving aircraft to and from the flight deck. They are among the largest items cast in the Foundry and are key to keeping ship construction on schedule. "Teamwork brings success," said **Kenny Sykes** (A572), a member of the melt crew,

which operates the huge furnaces that heat the metal alloy to 3,000 degrees Fahrenheit, and subsequently pours it into the mold.

The complex manufacturing process involves engineers, patternmakers, mold builders, melters, grinders, welders and inspectors. "We made a modification to the pattern based on input from the engineers to reduce time spent grinding," said Patternmaker **Chris Perry** (M71).

The melt crew also made operational improvements. "Our processes are more repeatable and consistent," said Melt Crew Foreman **Donald Thacker**.

Addressing dimensional corrections during heat treatment eliminated the need for separate straightening operations and netted additional time and cost savings. Because of improvements in the molding, melting and heating stages, less grinding and welding was required compared with previous guide rails.

"The oven operators, inspectors, X36 riggers and the engineering team worked together to carefully position and support the guide rail during heat treatment resulting in the casting passing the tough flatness requirement the first time through the process. It was an outstanding achievement for the team," said Foundry Engineering Manager **Jason Binns**.

The Foundry continues to implement improvements to reduce time and cost. "We are committed to further improvements," Forrest said. "The entire team is dedicated to providing a quality product on time to the CVN 79 team. We want to set them up for success."

Parking and Transportation Updates

Huntington Bridge Project to Begin June 4

The city of Newport News will begin a project to replace the Huntington Avenue bridge June 4, with completion of the project anticipated in June 2019. Though the start date for the project is next Monday, the bridge will likely not close until mid-June as preparation work (such as installing detours, signage, traffic signals, etc.) needs to be completed before construction can begin. Employees should pay close attention to signage, detours and markings. As additional information becomes available, it will be communicated to employees. For additional information, view the Distribution A memo or watch a video on MyNNS.

Motorcycle Parking Beside *Dorothy* Expanded

Due to an increased number of employees utilizing the motorcycle parking lot located beside *Dorothy*, the company has increased the number of parking spaces from 32 to 50. Facilities completed the repainting work last week, and the lot is currently available for motorcyclists.

Commemorating Memorial Day

Watch a video on MyNNS of shipbuilders reflecting on Memorial Day and honoring the lives of fallen service members.

Many shipbuilders attended an alumni reception earlier this month in honor of Thomas Nelson Community College's 50th anniversary. Photo by **Matt Hildreth**

NNS Helps Thomas Nelson Community College Celebrate 50th Anniversary

Among Newport News Shipbuilding's employees are more than 1,000 Thomas Nelson Community College (TNCC) alumni. The college – which is celebrating its 50th anniversary – and NNS have shared a close relationship for decades.

“For years, we have drawn from each other's resources and strengths to accomplish more than any of us can do on our own,” said **Ray Bagley**, vice president for Trades Operations and a TNCC alumnus. “Together, we have identified educational challenges facing our community and worked to address them. We have developed programs that enhance the skills of our existing

workforce and provide a pipeline of new employees for both our immediate and long-term hiring needs.”

Bagley's comments came during a special 50th anniversary reception held earlier this month for shipbuilders who are TNCC alumni. **Charles Southall**, vice president of Engineering and Design; **Gary Fuller**, director of Nuclear Engineering; and **Wayne Evans**, director of General Manufacturing – all TNCC alumni – also spoke during the event.

Southall encouraged fellow alumni to continue to support TNCC and its students. “For the next 50 years, let's all wrap our heads around how we – the shipbuilders who came from Thomas Nelson – can give back and help the shipbuilders who will come from Thomas Nelson,” he said.

Angel Harris-Holley (M32) said she has completed three leadership programs through TNCC and is working toward a business degree. “I've been going since I got hired here, and I'm not stopping,” she said after the alumni reception. “I try to encourage everyone else as well. When you continue to learn, you continue to do better in life.”

Harris-Holley said she started college several years ago and wasn't able to finish. But now that she's put her four daughters through college, it's her turn. “It is great to have the educational opportunities that the shipyard offers through Thomas Nelson,” she said.

Shipbuilders Present NNS FAME Project

Tom Bales (O41), **Aaron Zurfluh** (O41) and **Steve Kortz** of Huntington Ingalls Industries' division of the Facilities Asset Mobile Environment (FAME) Team, recently presented the NNS FAME project at two conferences.

Bales presented “From Old-School to World-Class: Newport News Shipbuilding's Asset Management Optimization” at the 2018 Waste Management Symposia in Phoenix, Arizona. The conference focuses on best practices in the nuclear waste management industry.

Kortz and Zurfluh presented “Out of the Desk Drawer and Onto a Tablet: Our Story of Asset Master Data Renewal” at the 2018 SAP Centric EAM (Enterprise Asset Management) Conference in Austin, Texas. “This conference focuses on SAP users, with emphasis on the Plant Maintenance and Materials Management modules of SAP. It's a lot of thought sharing by the actual users,” Kortz said. In addition, Bales participated as one of three experts on the closing panel who fielded questions from the audience about their asset management issues.

The presentations shared that the company combines mobile hardware, information about equipment and improved processes in order to better maintain production assets.

Both presentations generated follow-up questions and discussions from attendees who represented organizations such as Marathon Oil, Hallmark Cards, Dominion

Steve Kortz, left, and **Aaron Zurfluh** prepare for their presentation at the 2018 SAP Centric EAM Conference.

Energy, Houston Independent School District and the Royal Canadian Navy.

“It's a nice validation to see that we're headed in the right direction,” Zurfluh said. “Plus we get to see what other companies are doing, which gives us even more ideas about how to get even better.”

AROUND THE YARD

Relay For Life is Friday

Newport News Shipbuilding is partnering with the American Cancer Society to support this year's Relay For Life fundraiser. Events will be held Friday, June 1, from 5 p.m. until midnight at Tabb High School in Yorktown and from 7 p.m. until 2 a.m. at Chesapeake City Park.

Shipbuilders are welcome to register or make a donation at RelayForLife.org/NNS. For more information, contact **Christina Chapman** (E73) at 534-2652 or via email. Shipbuilder **Jenn Cherry** (O22) is a cancer survivor and a Relay For Life participant. Read why she supports Relay For Life below.

Everyone has their story as to how they have been affected by cancer. My story begins with my Grandma Millie, who had been diagnosed with multiple types of cancer. When she was diagnosed with breast cancer, it made me aware of the things I needed to do for myself – monthly self-breast exams, early mammograms, eating healthier, exercise, etc. I knew I wasn't able to entirely prevent it, but with education and early detection, I could be a step ahead if it did happen. I found a lot of valuable information through the American Cancer Society. My grandmother passed away in 2000 after a valiant battle. I attended my first Relay that next year, and I've been attending and participating ever since.

In January 2013, I went for my annual well woman's physical and everything checked out fine. Two days later, I went for my mammogram, and that didn't turn out quite so well. I ended up being diagnosed with Stage IIB breast cancer. That was alright. I pulled up my big girl panties, developed my plan and started kicking butt. I had a 14-year-old daughter at home, and I was going to be there for her. I dyed my hair pink, shaved it into a Mohawk and practically dared everyone to ask me why. I wanted people to become educated. I wanted them to learn their bodies so that they would know when something was wrong and be able to become their own self advocates.

Relay For Life 2013 was tough. I had a chemo treatment that morning and was exhausted, but I wasn't going to miss it. People were Relaying for me and I was going to Relay for them. Walking my first Survivor Lap was very emotional. Having all of these people I didn't know clapping and cheering me on and people I did know, stepping out on to the track to hug me as I made my way around, made me remember why I was there. I was there to fight, to keep Relaying for a cure, to keep Relaying for hope.

I Relay for me. I Relay for my daughter, Katelynn. I Relay for you. Join me in Relaying for everyone. Come experience Relay for yourself.

Jenn Cherry (O22)

Meet the New Doctor at the HII Family Health Center

The HII Family Health Center is hosting a meet and greet event Tuesday, June 12, for employees and their families to meet the new doctor, Joyce Lea, and the new nurse practitioner, Devin Bailey. Attendees can stop by any time from 3:30 to 5:30 p.m. to meet the staff, learn about the health center's services and enter a drawing to win a YETI cooler.

"My goal is to help people live healthier lives through education and encouragement," Lea said.

For details about the event, call the health center at 327-4200. The health center is available to employees and dependents enrolled in an eligible HII health plan.

Building a Culture of Engagement

Last year, a Culture and Engagement Team was established in the Human Resources and Administration Division at Newport News Shipbuilding in support of the NNSFORWARD Strategy. Check MyNNS and the NNS to Go app for information about engagement and to learn about engaged leaders at NNS.

Pictured from left are Nick White, Jordan Roth, Kitt Moger, Sean Coast, Hunter Atkins, Rob Uzzle, Will Ivey, Brian Weinz and Zach Blarr.

Apprentice School Wins College Fishing Event

The Apprentice School Bass Fishing Team competed in the YETI Fishing League Worldwide (FLW) College Fishing event on Smith Mountain Lake in April. The duo of **Hunter Atkins** (X31) and **Kitt Moger** (X43) won with a five-bass limit weighing 21 pounds, 2 ounces. Their top-10 finish secured them a place in the 2019 FLW College Fishing National Championship.

There were 109 boats competing, including teams from across the state and region. Moger and Atkins are also representing The Apprentice School in the 2018 FLW College Fishing National Championship in Shreveport, Louisiana. Apprentices **Nick White** (O68), **Sean Coast** (E06/E17), **Will Ivey** (X31), **Brian Weinz** (X32), **Zach Blarr** (X36) and **Jordan Roth** (O68) also represented The Apprentice School and had solid finishes. The team is coached by **Rob Uzzle** (X47).

DATEBOOK

WEDNESDAYS

Women in Shipbuilding Enterprise (WiSE) is sponsoring Walk with WiSE Wednesdays every week through May 30. Participants meet at 12:05 p.m. in front of *Dorothy* or in the VASCIC lobby to walk during their lunch break.

MAY 29

The Veterans Employee Resource Group (VERG) will hold a general membership meeting from 4:30 until 6 p.m. For more information, contact Adam Krininger (X84) at 380-4286.

JUNE 2

The Hampton Roads chapter of the Juvenile Diabetes Research Foundation will host a golf tournament at Sleepy Hole golf course. There will be a 1 p.m. shotgun start with a four-person Captain's Choice format. The cost is \$75 per person. Price includes green fees, cart, unlimited range balls, post tournament awards and dinner. NNS' Contracts and Pricing Department (O19) is supporting this community event to help find a cure for type one diabetes. For more information, contact Steve Speight (O19) at 380-7381.

JUNE 9

The 2018 Cardboard Boat Regatta, hosted by the Society of Manufacturing Engineers at The Apprentice School, has been rescheduled for Saturday, June 9. Teams will build cardboard boats and race them at 8 a.m. at Windsor Castle Park in Smithfield. All proceeds will benefit Shriners Hospitals for Children. For more information, visit nnappprentice.com/sme.

JUNE 11

The Project Management Institute at Newport News Shipbuilding (PMI-NNS) is hosting a meeting for shipbuilders who are interested in obtaining a Project Management Professional (PMP) certification through the Project Management Institute (PMI), including a boot camp at NNS. This meeting is open to all employees from 4:30 until 5:30 p.m. at VASCIC (2 West Dining Area). RSVP on the PMI-NNS website. PMI certification information can also be found on the website. For more information, email PMI_NNS@hii-nns.com.

JUNE 12

The Project Management Institute at Newport News Shipbuilding (PMI-NNS) is hosting a presentation titled "Courage to Move NNSForward" from 4:30 until 5:30 p.m. in VASCIC (2 West Dining Area). Attendees will learn about the role courage plays within project management and the NNSForward Strategy for business transformation. Greg Robinette (T53), Megan Windle (T53) and Jim West (T53) are the presenters. To RSVP, visit the PMI-NNS website. Email PMI_NNS@hii-nns.com for more information.

JUNE 14

The Veterans Employee Resource Group (VERG) is hosting a celebration for the Army's birthday at Applebee's (Bldg. 227) from noon until 12:30 p.m. For more information, contact Adam Krininger (X84) at 380-4286.

JUNE 15

The 13th annual F. Farrell Sanders Memorial Golf Classic will be held at Cypress Creek Golfer's Club. Tee off is at 11 a.m. with a post-tournament dinner to follow. To register a team, submit raffle prize donations or sponsor a tee box, contact Sarah Gentry (K45) at 329-2449 by May 30. All donations are tax deductible, and all proceeds will directly support Apprentice School athletic programs.

JUNE 16

The Hampton Roads chapter of the American Society for Nondestructive Testing (ASNT) Golf Tournament will be held at 7:30 a.m. at Sleepy Hole Golf Course. This is a four-person, Captain's Choice tournament. The cost is \$65 per person (\$260 per team). Price includes green fees, cart, unlimited range balls, post tournament awards and dinner. For more information contact J.J. Bosco (O37) at 688-2458 or 871-9837.

JUNE 19

Women in Shipbuilding Enterprise (WiSE) is hosting a lunch mixer featuring Christie Thomas, vice president of Contracts and Pricing, from noon until 12:30 p.m. at VASCIC (2 West Dining Room). Contact Krysti Filer (O12) via email to RSVP. Attendees must RSVP.

JUNE 30

Newport News Shipbuilding is a presenting sponsor of Hampton Roads PrideFest. The company is committed to a culture of inclusion and diversity and is proud to support the LGBT community. Visit the NNS booth at PrideFest from noon until 7 p.m. at Town Point Park in Norfolk for fun, information and prizes. The event is free and open to all.
