Foremen Complete EH&S Rotations

X36 Foreman **James Insley** admits he was not exactly thrilled when he found out he would leave his crew for the month of February to work in the Environmental Health and Safety (EH&S) Department (O27) as part of a new foreman rotation program.

"The natural reaction was apprehension," he said. "But it turned out to be one of the most influential learning experiences of my career."

Each month since February, two new foremen have completed monthlong rotations working full time in EH&S. Health and Safety Manager **George Riefler** said participants build relationships within the department while also learning about EH&S and its different facets.

"We expose them to all the different areas that we have like accident investigation, electrical safety, control of hazardous energy and even traffic safety," he said. "They pretty much shadow our people wherever they go and see all of the things that we cover."

In March, participants began trading their normal trades hard hats for O27 hard hats and immediately noticed different reactions from fellow shipbuilders. "That's one of the things that we're trying to turn the tide on," Riefler said. "Certainly, we have some compliance factors and enforcement that we're obligated to do, but really we're there to perform job site safety analyses, identify safety issues and help get them resolved."

New Parking and Transportation Resources Available

Three new resources dedicated to parking and transportation services at Newport News Shipbuilding are now available to employees. The resources include a new parking/transportation section within the NNS to Go app and two new websites – one on the company's public-facing webpage and another on MyNNS.

Content featured on the app and public-facing website is identical and includes information about parking, decals, commuter options and transportation services at NNS as well as frequently asked questions, a list of contacts and a color-coded parking map. The main difference between these resources is that the app also features an area linking to parking articles, notices and reminders.

X18 Foreman **Tracy Howard**, who went through the program in May, said he is now more equipped to eliminate as many hazards as possible before putting a craftsman or craftswoman on a job. "A lot of people think O27 is just out to try to write you up, but it's not. It's all about evaluating jobs and making sure people are doing what they're supposed to do to stay safe," he said.

X36 Trade Director **Dave Vandegrift** was an early proponent of the program, and several of his foremen have already completed the rotation.

"Safety is the cornerstone of all we do as shipbuilders. The company's workforce is transitioning to the next generation, and there is an opportunity to ensure that our new leaders, craftsmen and craftswomen learn to identify potentially unsafe conditions so they can implement the appropriate controls to eliminate the risk

of injury," he said. "This rotational program gives the foremen a different perspective of the company and provides opportunities for education. It allows them to develop relationships with experts in each functional area of the safety department."

Foremen from across the yard are signed up to participate through November, and Riefler hopes to continue the program beyond this year. While the rotation is beneficial to foremen and the craftsmen and craftswomen they supervise, it also has a positive impact on EH&S.

"The foremen are definitely able to give us a lot of good insight into how things really work on the waterfront. It's a win-win for us and the trades," Riefler said. "I want the O27 team to truly understand the challenges for waterfront employees and appreciate the things they deal with on a daily basis."

Cover photo: **Brandon Piggott**, from left, gets a visit from **James Insley**, **Tracy Howard** and **Stephanie Neary** while working on *John F. Kennedy* (CVN 79). Insley and Howard are foremen who have completed the Environmental Health and Safety rotation, and Neary works in EH&S.

LGBT Pride Month: Chris Konkel

June is LGBT Pride Month. The theme for this year's Inclusion and Diversity (I&D) monthly recognition campaign is "Unite Our Voices by Speaking Together." As part of the campaign, four employees will be featured during each recognition month – two from within the featured demographic and two outside of it. Employees will share personal stories, insight and perspectives on what the month means to them. Features will be published in Currents, the NNS to Go app, MyNNS and HII social media channels.

Chris Konkel (X18) is proud to be part of the growing LGBT community at Newport News Shipbuilding.

"As a structural welder for going on seven years, I've had the opportunity to work alongside great shipbuilders from various demographics and backgrounds – including shipbuilders like me who identify as LGBT," he said.

Konkel says that over time he's learned to let people get to know him first before sharing experiences or details about his life outside work. "I've found that when people get to know you for who you are first, they're more accepting," he said. "So I usually let them get to know me for a couple months before opening up."

During his career at the shipyard, he admits that he hasn't had an overwhelmingly positive or negative reaction when people find out that he is part of the LGBT community.

"I don't consider myself to portray the typical gay profile or stereotype, so it usually comes as a surprise to most people when they find out I'm gay," he said. "Once they know, most people don't treat me any differently than they did before, but I have experienced name calling or people insisting that I haven't found the right woman yet. Though hurtful, I don't let it bother me."

Today, Konkel is on loan to the Non-Destructive Testing Department (O38).

"I am responsible for preliminary weld inspections for structures used on *Virginia*-class submarines," he said. "I love my job and I'm proud to work for a company that is supportive of Pride Month and other months throughout the year. Inclusion and diversity is so important on so many levels. If you only look at things from one point-of-view, you can only move forward in one direction. If you're inclusive of all people, the possibilities are endless."

View Konkel's poster on MyNNS. Employees interested in participating in this year's I&D campaign should visit nns.huntingtongalls.com/id-campaign-2018.

IPPC and Operations to Begin Transformation Initiatives

As part of the company's NNSFORWARD Strategy to transform business operations, the Integrated Planning and Production Control (IPPC) and Operations divisions will soon begin efforts to transform aspects of the business to be more agile and efficient – with special focus on people, technology and culture.

“Timely construction and maintenance of ships is crucial to our ability to meet our customer needs on existing orders as well as our ability to successfully grow the business” said **Dannon Butts**, Industrial Engineering and Business Transformation director.

For the past eight months, Newport News Shipbuilding has worked to identify and evaluate challenges related to organizational performance and is now ready to roll out improvement initiatives.

The first area of focus will be Structural Fabrication and Assembly (SFA) in the Ring Module Shop (RMS) beginning this month. “SFA builds all the steel structure early in the ship construction process and supports all programs at NNS, which is why we are starting transformation efforts in this area of

Willie Hayes, director for Submarine Construction in Structural Fabrication and Assembly, center, talks with employees in the Ring Module Shop about upcoming transformation initiatives. Photo by **Matt Hildreth**

the company,” said **Barry Fallon**, SFA director. “We owe our people the tools, technology, facilities, training and quality of life to be successful. Change is essential to ensure our shipbuilders thrive and our company succeeds”

In the coming weeks, shipbuilders in the RMS will begin to see activities focused on creating a culture of mutual respect, accountability, craftsman support, material flow, adherence to schedule, and LEAN simplification of business systems and processes.

“Shipbuilders at every level will be asked to participate in meetings, workshops and training,” Butts said. “Employee feedback and two-way dialogue is a big part of transformation efforts and is absolutely critical. We want all shipbuilders to be empowered to share ideas and opinions on how things are going or ways to make improvements.”

VERG Hosts Army Birthday Celebration

The Veterans Employee Resource Group (VERG) hosted Newport News Shipbuilding's first-ever U.S. Army birthday celebration June 14. Three VERG members kicked off the lunchtime event with a cake that featured the Army logo.

“Being a vet, you show pride in your branch. Each branch is different, but we served for the same cause,” said VERG Director of Publicity and Communication **Allen Johnson** (X82), who served in the Army for five years. “This event gives some gloating rights for the vets. It's our day. Just a small opportunity to show some pride at work that I served. And I'm still serving here at the shipyard.”

VERG members **John Kelly**, from left in the foreground, **Paula Young** and **Allen Johnson** hand out cake and bottled water in Applebee's (Bldg. 227) to celebrate the U.S. Army's birthday. Photo by **John Whalen**

This event was the first of many more military branch birthday celebrations to come. VERG will celebrate the Coast Guard's birthday at noon on Aug. 3 at Applebee's (Bldg. 227). For more information about VERG, contact **Adam Krininger** (X84) at 380-4286 or visit the website.

New Parking and Transportation Resources Available

CONTINUED FROM PG 1

The sole purpose of the MyNNS website is to house internal forms not available on public-facing forums, including the NNS decal request form and an area for shipbuilders to post rideshares. Shortcut links to the public-facing website are also available. In the future, the company's parking policy will also be added to this page.

"Knowledge is key and our goal is to equip all shipbuilders – those with and without computer access – with the tools necessary to find the most current information about available parking and commuter options," said **Steve White**, Parking Committee chairman. "I encourage all employees to download the NNS to Go app and visit the websites. Based on feedback we receive, we will continue to modify, add and make adjustments as needed to ensure these resources are as useful as possible for all shipbuilders."

NNS to Go is available for free download in the Google Play and Apple App stores by

A shipbulder looks at the new parking/transportation website. Photo by John Whalen

searching, "Newport News Shipbuilding." If needed, instructions on how to download the app are available.

The public-facing website is available at nns.huntingtoningalls.com/parking-transportation and a shortcut to the MyNNS parking/transportation site is available on the MyNNS homepage under "NNS Resources."

In the coming weeks, a fourth parking resource – the NNXPRESS app – will also be available to employees. This app will track company shuttles and taxis in real time. Additional information about NNXPRESS will be communicated via company communication channels.

Employees learn about services available to them during the "Fun at the Park" event. Photo by Ashley Cowan

Shipbuilders Have "Fun at the Park"

Dalana Simmons (X36) and **Jamaica White** (X32) were leaving work on a recent Wednesday afternoon when they came across a party in the park at 47th Street and Warwick Boulevard. Curious, the two decided to check it out.

It turned out they were just the intended audience for the "Fun at the Park" event, which showcased programs and services that are available to shipbuilders – including the Employee Assistance Program (EAP), QuadMed, Onsite Dental, Pivot Physical Therapy, the YMCA, NNS Food Services and others.

"It was very helpful to see what the company offers for employees," Simmons said. Shipbuilders could also enjoy healthy snacks, line dance, play games and win prizes.

The event was hosted by the Quality of Life (QOL) Health and Financial Wellness Team, one of 10 teams within the Operations Division intended to improve shipbuilders' quality of life. "We are trying to bring everything that can help our employees to one area and have fun at the same time," said **Sonya Boone** (O48), who serves on the team.

"It was also an opportunity to show appreciation to shipbuilders," said **Greta Foster** (O48), who also serves on the Health and Financial Wellness team.

Monthly "Fun at the Park" events are planned for the summer. Check future editions of *Currents* for information about upcoming events.

AROUND THE YARD

FOCUSNNS

Watch Focus NNS

The June edition of Focus NNS is available for viewing on MyNNS, on the NNS to Go app and on Newport News Shipbuilding's external website.

This edition features the keel authentication for *Montana* (SSN 794), *Indiana* (SSN 789) sea trials, NNS' partnership with 3-D Systems and signing day at New Horizons Regional Educational Center.

NNS Revamping Time Certification Process for Hourly Employees

In the coming weeks, Newport News Shipbuilding will roll out an improved time certification process for hourly employees. It is one result of a three-year comprehensive review of the company's timekeeping processes, policies, procedures and systems.

Starting June 25, hourly employees will be able to use time clocks to electronically certify time charges that were entered or changed by someone else. The new process replaces the manual process that required paper certifications be delivered to employees via Yardmail and then sent back to the Payroll Department.

"This allows us to get rid of a lot of paperwork that goes back and forth in the current process," said **Kerry Edwards**, manager of the Labor Compliance Department. "The automated process will be faster, easier and more convenient for our hourly employees."

Supervisors have been enrolled in a brief LX training course that explains the process. Hourly employees will be briefed by their supervisors later this week.

The success of this improved process hinges upon each employee entering time accurately and resolving certifications in a timely manner.

Career Pathways Hosts Final Egg Drop Competition

Career Pathways recently hosted its seventh annual Egg Drop Competition at Newport News Shipbuilding. More than 50 students representing middle and high schools in Hampton, Newport News and Williamsburg/James City County created capsules to hold eggs as they were dropped.

Throughout the school year, Career Pathways representatives traveled to participating schools to facilitate egg drop competitions. Winning teams from each school were invited to NNS to compete for a trophy and the title of winning middle or high school.

The competition focused not only on engineering and design, but also on soft skills involved in working on a team, including problem solving and communication. Teams were judged on the integrity of the egg following the drop and on their team presentations.

"It was awe inspiring. The students had logical thoughts defining career readiness

Students from across the Peninsula gathered at Newport News Shipbuilding for Career Pathways' Egg Drop Competition. Photo by John Whalen

skills and creativity during brainstorming sessions," said **Latasha Jarrett** (O22), the Career Pathways volunteer who led the competition.

This was the egg drop competition's final year. Next year, Career Pathways would like to introduce a digital-based competition, such as a hack-a-thon, to the local schools. "Students are drawn to technology, and a digital-based competition will encourage out-of-the-box thinking," Jarrett said.

Shipbuilders Helping to End Child Poverty

The Nuclear Propulsion – Business Operations Department (E89) led a company-approved campaign to help raise more than \$350 in support of Red Nose Day on May 24. The proceeds from selling red noses for \$1 each went to support children in poverty in all 50 states and in developing countries. Donations support good health, safety and education for less-fortunate children so they too can have a bright future.

NOTICE: Access Center Closing

The Access Center in Bldg. 625-1 will close for quarterly maintenance from 11:30 a.m. until 1 p.m. on Friday, June 29.

DATEBOOK

JUNE 19

Women in Shipbuilding Enterprise (WISE) is hosting a lunch mixer featuring **Christie Thomas**, vice president of Contracts and Pricing, from noon until 12:30 p.m. at VASCIC (2 West Dining Room). Contact **Krysti Filer** (O12) via email to RSVP. Attendees must RSVP.

JUNE 21

The African American Shipbuilders Association (AASA) will host a meet and greet event from 4:30 to 6 p.m. in the VASCIC auditorium. This event's theme is "Being Relevant and Being Tenacious." **Derek Jenkins**, NNS' director of Security and Emergency Management, will be the guest speaker. All shipbuilders are invited to attend. For additional information about the event or the AASA employee resource group, visit the AASA website.

JUNE 26

Attend this month's SmartPath class on debt management to learn how you can get rid of credit card debt, tax debt and more. Classes are offered from 6 to 6:45 a.m. in Bldg. 1744-6 (Operations Conference Room), from noon to 1 p.m. in Bldg. 520-6 (James River Room) and from 4:30 to 5:30 p.m. in The Apprentice School (Classrooms 258-260). Registration is required. Shipbuilders should email BeWell@hii-co.com to register for their preferred class time by June 22 or ask their foreman to register them. Space is limited. Management-approved PTO/Flex is required during scheduled work hours.

JUNE 26

Talent Acquisition (K21) and Career and Professional Development (O44) are sponsoring resume clinics from noon until 1 p.m. and from 4 until 5 p.m. in Bldg. 520-6 (Forrestal Room). Shipbuilders can meet with NNS recruiters and receive feedback on their resumes. No charge will be provided.

JUNE 27

An Enterprise Rideshare interest meeting will be held at 4 p.m. in Bldg. 520-6 (James River Room). All employees are invited to attend. Enterprise representatives will explain additional details about the program, answer questions and assist employees with signing up. Attendees must RSVP to ParkingSolutions@hii-nns.com. For more information, see the June 11 edition of *Currents* or visit enterprisridesshare.com.

JUNE 28

The Society of Manufacturing Engineers (SME) will sponsor a tour of Advex Corporation from 4 to 7 p.m. at 41 Research Dr. in Hampton. Founded in 1969, Advex provides precision machining, fabricating, non-destructive testing and marine and industrial services to the defense industry and commercial customers. Dinner will follow the tour. The cost for SME members and guests is \$15. For students and seniors, the cost is \$10. To RSVP or for more information, contact **John Edwards** (E84) at 876-8386 or via email.

JUNE 28

The "Spear and Gear" Toastmasters Club will host a meeting from 4:30 to 5:30 p.m. in Room 247 at The Apprentice School (Bldg. 1919). The event is open to all Newport News Shipbuilding employees and no RSVP is required. The event will provide a forum for employees to learn how to become more effective communicators and leaders. For more information, contact **Jason Paquette** (E83) at 534-2770.

JUNE 30

Newport News Shipbuilding is a presenting sponsor of Hampton Roads PrideFest. Visit the NNS booth at PrideFest from noon until 7 p.m. at Town Point Park in Norfolk for fun, information and prizes. The event is free and open to all.

Huntington Avenue Bridge Replacement Project Update

The city of Newport News has released anticipated milestone dates for the Huntington Avenue bridge replacement project. Key dates include:

- Week of June 18: Maintenance of traffic signs installed, but to remain covered until the traffic switch.
- Week of June 25: Temporary traffic signal installed and additional traffic signal modifications implemented. HRT bus stop relocated.
- June 28: Variable message board placed at Huntington Avenue and 43rd Street.
- July 6-8: Detour set in place and road closed.

The schedule is subject to change due to weather. Watch a video about the project on MyNNS. Updates will be communicated via *Currents* as the project progresses.

IN APPRECIATION

Thanks Wayne for everything you've done for E82! Much appreciated, and you deserve to be recognized.

Former Shipbuilder Creates Shipyard Art

Cynthia Newton always wished she could take pictures when she worked at Newport News Shipbuilding from 2007 until 2013.

"I loved the different retro-colored blues across the different units, the rusted red jigs, the angles casting dark shadows that bounced off opposing units, metal slabs of squares and triangles with circles cut out for manholes...so many shapes and raw details screaming, 'Paint me.' 'Photograph me,'" she said. "But I couldn't due to the camera policy."

When Newton, who now works as an event painter, heard about NNS' new 315-metric-ton Goliath gantry crane, she had to come see. She was granted permission to sit outside the gate to create paintings of the crane's progression.
