

Testing on New Crane Nearly Complete

Operational and load tests for Newport News Shipbuilding's new Goliath gantry crane are 90% complete. The 315-metric-ton crane is replacing the green 310-long-ton crane used for aircraft carrier refueling and complex overhaul (RCOH).

New technology and advanced systems give the new crane an edge over the older one, which has stood at dry docks 10 and 11 since 1969. "It's not the amount of weight that it can lift that has changed between the cranes, but more so, the newer technology and safety components that are required to support the RCOH program," said Engineering Manager **Brian Jones** (O48).

Cutting the Ribbon at Brooks Crossing

Many Newport News Shipbuilding employees and area residents attended a ribbon-cutting ceremony celebrating the multifaceted community partnerships at Brooks Crossing in southeast Newport News on Saturday.

The facility is a collaboration between NNS, Old Dominion University, the city of Newport News, the Newport News Economic Development Authority and other community partners.

“Brooks Crossing will be the tie that binds Newport News Shipbuilding with our southeast community,” said NNS President **Jennifer Boykin**. “This new state-of-the-art facility will provide a place for our shipbuilders to lead the way into the digital age of shipbuilding, while also introducing community members of all ages to STEM-related jobs and activities.”

The facility includes the STEM Digital Innovation and Fabrication Lab and the Brooks Crossing Opportunity Center. The “Fab Lab,” will focus on digital technologies used in design and fabrication, while the opportunity center will serve as a centralized hub for career awareness and development.

About 600 NNS employees are working on the top three floors to reimagine design and manufacturing processes.

NNS Honors Fallen Shipbuilder

Tim Ewing, a construction supervisor who worked at Newport News Shipbuilding for 39 years, sustained a fatal injury while working on USS *George Washington* (CVN 73) on Aug. 19.

NNS flags were lowered last week to honor Ewing, and there was a memorial whistle blow Friday morning. In appreciation of his years of service to the company, Ewing has been named an honorary Master Shipbuilder, the title bestowed upon employees with 40 or more years of continuous service. NNS is also making a \$10,000 donation to the Boy Scouts in Ewing’s name.

“Tim’s death is one of our darkest moments, yet it is evident that his light continues to shine through all the lives he touched at the shipyard and in our community,” NNS President **Jennifer Boykin** wrote in a message to shipbuilders on Friday.

Lean Implementation: Team Concept

Newport News Shipbuilding is implementing Lean – a process improvement method that streamlines workflow and removes waste – using five work streams, including Team Concept.

Craftsmen and craftswomen can encounter a variety of issues that cause them to stop working and wait for a resolution. The team concept structure, along with crew leads, helps prioritize issues and enables shipbuilders to perform more value-added work. Leads also mentor and teach the crew to increase overall team competency.

Watch a video on MyNNS that explores the benefits of the Team Concept work stream.

It typically takes eight hours to secure the 310-long-ton crane in emergency situations like hurricanes, whereas the new one can be secured in about one hour. The new crane can also lift a full capacity 315-metric-ton load from one hook, while the older one would need all four of its hooks tied together to achieve its maximum load. “This makes for much safer lifts and gets the job done in less time,” Jones said.

Over the coming weeks, gantry testing on the new crane will begin to ensure movement is smooth and speeds are accurate before it is handed off to Waterfront Support Services (X36) for training and production use.

The green crane will be taken out of service by the end of the year, and deconstruction is set to begin in January.

Shipbuilder Creates Poster Promoting Safety for Forklift Spotters

After an accident left a fellow shipbuilder injured, **Scott Speight** (O53) was inspired to draw a poster to show employees how to safely act as a forklift spotter.

“My personal goal was to have at least one person pay attention to it and pass that knowledge on to potentially prevent a serious accident or injury,” he said. “I was just trying to bring attention to the issue because I have seen posters that grabbed my attention and made me think.”

The poster, which now hangs in areas across Newport News Shipbuilding, features the acronym, S.A.F.E., which means stand clear of the load, acknowledge hazards, focus on a clear path and execute the lift.

Rodney Thornton Jr. (O53), who is a member of the Logistics Forklift Training Team with Speight, said it’s important to remind shipbuilders to pay attention to detail. While there is not specific training for spotters, the Forklift Training Team – which trains new hires in Logistics – has helped dramatically reduce the number of forklift accidents.

“We want people to know what you do affects other people. The safer you operate, the safer the people around you will be,” Thornton said. “If you see something that’s unsafe, speak up.”

Shipbuilders Support Virginia Peninsula Foodbank

Shipbuilders recently raised more than \$700 in support of the Virginia Peninsula Foodbank’s summer drive.

Foodbanks often experience a significant drop in donations during the summer months. “Hunger doesn’t take a vacation, so our teammates on first and third shift in O68 and our building partners in Bldg. 4931 joined forces to help with that need,” said **Paula Young** (O68), who is a member of the O68 Safety, Engagement, and Communication Action (SECA) Committee.

Young and the rest of the SECA Committee are grateful for the shipbuilders who come together to support Newport News Shipbuilding and community initiatives.

PEER Program Seeking Applicants for Next Cohort

The Professional Enhancement and Enrichment Rotation (PEER) Program is seeking qualified applicants for its next cohort, which will begin in January. The program is open to salaried individual contributors.

Learn at lunch events are planned for September and October. Check the Datebook for dates and locations. Open house events will also be held from 4 until 6 p.m. Oct. 2 in Bldg. 520-6 (James River Room) and Oct. 16 in Bldg. 903-7 (MDC). For more information, visit the PEER website.

CVN 78 Leadership Team Hosts Appreciation Cookout

The USS *Gerald R. Ford* (CVN 78) leadership team hosted an appreciation cookout on Aug. 15 for CVN 78 shipbuilders to celebrate their hard work and dedication to commencing the path toward *Ford*'s redelivery.

“The opportunity to lead the shipbuilders on this program is an honor. Providing these lunches is just a small token of our appreciation for the hard work they do each and every day. These men and women are dedicated to the redelivery of *Ford* so our U.S. Navy can continue defending our freedom,” said **Dave White**, trades director for the CVN 78 Program.

As the lunch whistle blew, shipbuilders lined up for their free lunch. During the cookout, shipbuilders had the opportunity to mingle with their management team and members of the U.S. Navy.

“We have an amazing and fully engaged team of shipbuilders on *Ford* who are committed and working closely with our Navy partners as we move closer to redelivery,” said **Lucas Hicks**, vice president of Aircraft Carrier Construction.

The leadership team is planning cookouts for second- and third-shift shipbuilders in the coming weeks.

Employees in New Carrier Production Control (X76) collected seven boxes of school supplies.

School Tools Drive a Success

Newport News Shipbuilding employees donated more than 22,500 school supplies for students across Hampton Roads during this year's School Tools Drive.

Supplies donated included pencils, pens, paper, notebooks and backpacks through box collections and online giving. This year, School Tools Drive collection containers were placed inside gates at turnstiles for easy drop off for employees in transit.

“Together, we are able to create a long-lasting change in our communities. Thanks to our shipbuilders and their incredible performance during the collection of school supplies, children who otherwise could not afford supplies will now have those items for the journey to success,” said **Gary Artybridge Jr.**, manager of Corporate Citizenship. “Our achievement shows that advancing the common good within our communities is something we all can do through giving, advocating and volunteering.”

Donated school supplies are being distributed via social services agencies in Newport News, Hampton and York/Poquoson, as well as local Boys & Girls Clubs and ForKids in Norfolk.

WW Workshops to Begin

WW (formerly Weight Watchers) at Work will start new programs at Newport News Shipbuilding soon. Starting Sept. 11, WW at Work will hold workshops at 4 p.m. on Wednesdays in the HII Family Health Center (Large Conference Room). Shipbuilders Sing National Anthem at Pilots Games

Newport News Shipbuilding is a sponsor of the Peninsula Pilots baseball team. The team hosted two shipbuilder appreciation nights in July. Shipbuilders **Ashley Bryant** (K46) and **Sandra Lynch** (O51) sang the national anthem before the games.

Breast Cancer Awareness T-shirts Available

Shipbuilders can purchase T-shirts in support of the Making Strides Against Breast Cancer effort through Sept. 20.

Proceeds from sales will support investment in groundbreaking breast cancer research, services – such as access to mammograms – for women diagnosed with the disease, and the availability of free information to help educate others about the warning signs.

T-shirts are available in charcoal or pink and range in price from \$13 to \$15. Sizes range from small to 5XL. They feature a shipyard design on the back and a pink ribbon on the front. To purchase T-shirts or for more information, contact **Paula Young** (O68) at 688-7634 or via email or **Brenda Meekins** (O26) at 380-3239 or via email.
