New Data Drives Welders

Looking to transform and enable the welding workforce, Newport News Shipbuilding partnered with Lincoln Electric to track welders' arc times (actual weld time). The company supplied NNS with S500s – weld machines that can track arc time during a welder's shift. The data is now readily available for both foremen and welders and is transforming the culture.

“This is a process that is not only improving performance, but helps educate all of our welders and their foremen,” said Trades Director **Joe Sabol** (O61), adding that the data has proved helpful given NNS has hired hundreds of new welders in the last year.

Beginning last year, the welding supervisors started collecting the data from the equipment and found several opportunities to increase arc times during an eight-hour shift. Foremen began sharing the data with welders, resulting in accountability and a competitive atmosphere to grow and thrive.

Terry Campbell (X18) is a 30-year welding veteran and currently holds one of the longest arc times at 247 minutes during an eight-hour shift.

“I made a challenge out of it. I just went for it. Old school wanted to

show the young school how it was done,” he said with a chuckle. Foreman **Matt White** was inspired by Campbell and wanted to share his enthusiasm, so he divided the crews into teams to create a fun and friendly competition. It caught on quickly and White says the outcome has been very positive.

“My welders are challenging themselves daily. They love it. We pick a winner each week, but it's not always about the highest arc time. It could be based on a really difficult job or a personal goal that was accomplished during work that week – and quality is always top priority,” White said. Winners are recognized in front of their peers along with a belt similar to belts awarded to boxing champions.

In addition to tracked arc times and the use of craft learning centers to improve welding knowledge and skills, foremen are using an app, created by Dogfish Labs, to see real-time results from their teams immediately.

“This allows foremen to provide support right away to a welder or congratulate them on the spot for doing a great job. It really is about working smarter,” Sabol said.

Happy Independence Day

Americans will celebrate the United States' 244th birthday on July 4. Newport News Shipbuilding is proud to support our nation and the brave men and women who help protect our freedom.

All shipbuilders should take a moment to reflect on the vital role they play in the nation's defense.

New Data Drives Welders

CONTINUED FROM PG 1

X18 Trades Administration is working with Lincoln Electric and NNS IT to make the S500s wireless for expansion across all programs. The data will also be used by Welding Services (O43) to help identify machine usage which allows for better utilization of the equipment and facilitates easy remote loading of software upgrades.

"I Build, We Build": Kelsey Lai

Shipbuilder **Kelsey Lai** believes in the power of community. As a volunteer emergency medical technician, she puts others first, extending a compassionate hand at a moment's notice.

"Growing up, my parents always told me the best thing to do in life is to help someone else," she said.

Lai volunteers her time and EMT skills for the city of Virginia Beach almost every weekend. With a husband and a 5-year-old, it hardly seems possible that she could do it all. "I don't sleep much," she said with a smile, "but my husband and I have worked out a schedule."

Lai believes volunteering as an EMT is the best unpaid job she has ever had. It allows her to see another side of humanity and help

people. Much like her engineering job, being an EMT allows her to troubleshoot to quickly find solutions.

"As an engineer, I'm trained to think a certain way. I assess a process in my job. As an EMT, I assess people," she said.

In a time of much uncertainty, Lai understands her purpose and hopes to spread her joy of living to the fullest with everyone. "When you know you have changed someone's life, that's very rewarding," she said.

See the ad featuring Lai below. Watch a video on MyNNS, the NNS to Go app or company social media channels to learn more about her and how she builds purpose.

I BUILD PURPOSE

Engineer. Volunteer Emergency Medical Technician. Teacher. Kelsey Lai pours her passion into helping the community, shipbuilding suppliers, and her son with his math and science homework. In a time of much uncertainty, she understands her purpose, hoping to spread her joy of living to the fullest with everyone.

Have an idea for a future "I Build, We Build" feature? Send an email with details to communications@hii-nns.com.

AROUND THE YARD

A production of Newport News Shipbuilding

Watch Focus NNS

The latest edition of Focus NNS features an update on COVID-19 cases at Newport News Shipbuilding, a 96,000-pound Foundry pour for *Enterprise* (CVN 80) and a look at the work on the electromagnetic aircraft launch system (EMALS) on *John F. Kennedy* (CVN 79).

Watch Focus NNS on MyNNS or at nns.huntingtoningalls.com/focusnns.

Security Reminders for Shipbuilders

To help prevent the spread of COVID-19, Newport News Shipbuilding has implemented changes to business practices in recent months. Shipbuilders now rely heavily on technology to complete work within the scope of contract terms and delivery expectations. However, NNS Security reminds employees that safeguarding controls, markings, transmission, and protection of sensitive information remains vital.

Whether working on-site or off-site, shipbuilders must ensure they meet security standards of protection and safeguarding of Controlled Unclassified Information (CUI) and Unclassified Naval Nuclear Propulsion Information (U-NNPI).

Learn more about security protocols, including specific information about permissions, controlling documents, off-site home protection, proper use of computers in an off-site setting and other policy guidance, on MyNNS.

REMINDER: Open Parking Policy

Newport News Shipbuilding parking spaces remain open for use except spaces reserved for expecting mothers, handicap spaces, government spaces, and spaces assigned to the HII Family Health Center and privately owned lots. This also includes parking spaces reserved 24/7. As a reminder, vehicles parked illegally are subject to towing at the owner's expense.

For parking and transportation information, email ParkingSolutions@hii-nns.com.

REMINDER: Update Tobacco-Use Status by June 30

United Steelworkers, guards and salaried employees enrolled in a Huntington Ingalls Industries medical plan must update their tobacco-use status to "tobacco free" to save \$660 annually on their medical insurance if they do not use tobacco. Employees must update their tobacco-use status by June 30 to save for the upcoming benefit plan year. Employees can update their status online in UPoint at www.hiibenefits.com or by calling the Huntington Ingalls Benefits Center at 1-877-216-3222.

Engineering and Design Food Drive a Success

The COVID-19 pandemic led to unprecedented demand for the Virginia Peninsula. Newport News Shipbuilding's Engineering and Design Division hosted a food and funds drive from June 1-12 to benefit the food bank.

Due to social distancing guidelines and the large number of people working from home, most donations were made through the foodbank's website. They raised \$4,243.42 – which will provide more than 16,000 meals – and collected 250 pounds of non-perishable food items. This community outreach event was organized by Engineering and Design's Inclusion, Diversity and Engagement (IDE) Champions as a way to give back to the community and bring people together for a worthy cause.

BENEFITS WEBSITE WILL NO LONGER SUPPORT INTERNET EXPLORER

Alight, Huntington Ingalls Industries' benefits administrator, has updated its security protocols to enhance employees' online safety. Starting July 1, Alight's UPoint system and the HII benefits website will no longer support the Internet Explorer web browser. When accessing www.hiibenefits.com or UPoint, employees are encouraged to use Microsoft Edge, Google Chrome, Firefox or Safari web browsers. This change also applies when accessing UPoint from a personal computer. For questions, email BeWell@hii-co.com. Shipbuilders who do not have access to one of the suggested web browsers on their Newport News Shipbuilding computer should contact the Service Desk for support.

DATEBOOK

JULY 7-28

Attend weekly mindfulness webinars to learn relaxation techniques to reduce stress when life gets tough. Webinars take place on Tuesdays in July from noon to 12:30 p.m. starting July 7. Visit www.myquadmedical.com/hii to register

JULY 8

Attend a webinar on to learn useful techniques to fall and stay asleep to improve your health. The “Sleep Your Way To A Healthier Life” webinar is available through BeWell for Life from noon to 12:30 p.m. To register, visit www.myquadmedical.com/hii.

JULY 22

Ever been tempted to borrow from your 401(k)? Attend SmartPath’s July webinar to learn the pros and cons of 401(k) loans and the unique rules associated with them. Register at www.joinsmartpath.com/hii/classes for the noon webinar. All employees have access to SmartPath at no cost.

Blood Drives Planned for July

Newport News Shipbuilding is hosting two blood drives for the American Red Cross in July. A time charge is available for shipbuilders who donate. The Red Cross also will test all blood donations for COVID-19 antibodies as an additional health service.

Blood drives will be held from 7:30 a.m. until 12:30 p.m. Wednesday, July 8, and Friday, July 10, in Bldg. 520 (James River Room). To schedule a donation, contact **Natasha Eck** or **Judy Fundak** via email.

Volunteer opportunities are available for shipbuilders from 7:30 a.m. until 12:30 p.m. on both days to take temperatures and man registration and canteen tables. Volunteer shifts are a minimum of one hour. Email corporatcitizenship@hii-nns.com to volunteer.

Due to safety protocols in place to prevent the spread of COVID-19, future blood drives will be held in Bldg. 520 twice per month. Learn more about safety measures on MyNNS.
