

# = PROTECTION

## *Benefits of the COVID-19 Vaccine*

### 1 COVID-19 VACCINES WILL NOT GIVE YOU COVID-19

### 2 COVID-19 VACCINATION WILL HELP KEEP YOU FROM GETTING COVID-19

- All COVID-19 vaccines that are in development or being distributed are being carefully evaluated in clinical trials.
- Experts believe that getting a COVID-19 vaccine may also help keep you from getting seriously ill even if you do get COVID-19.
- Getting vaccinated yourself may also protect people around you.

### 3 COVID-19 VACCINATION IS A SAFER WAY TO HELP BUILD PROTECTION

- There is no way to know how COVID-19 will affect you but if you get sick, you could spread the disease to friends, family, and others around you.
- COVID-19 vaccination will help protect you by creating an antibody (immune system) response without having to experience sickness.

## WE MUST USE ALL THE TOOLS THAT ARE AVAILABLE TO STOP THIS PANDEMIC

Wearing masks and social distancing help reduce your chance of being exposed to the virus or spreading it to others.

Vaccines will work with your immune system so it will be ready to fight the virus if you are exposed.
