Willie Hurdle

My name is Willie Hurdle. I work for O45 Transportation. I've been part of the shipyard for eight years. I think it's important for all of us to get this vaccine. I really do. I think it's important because you want to get back out in the world. You want to go to restaurants. You want to go to the movies. You want to enjoy your family.

I'm a shuttle driver. I'm also a dispatcher. So I interact with people all day, 12 hours a day, five days a week. Getting this shot, it'll give me a sense of I'll be comfortable knowing that I had it. But you still got that 50% that don't want to have it.

Lead by example. If they see me and my fellow coworkers getting it, and they see that we're doing fine and everything, I hope and pray that they would follow suit and do the same thing. Like I said before, we need to start somewhere. And this is a starting point.

We are used to living in a world where we can go where we want to go, have fun, be free. This virus came around and everything, and just shut everybody down, and we're not used to that. We need to get back to where we were, and in order to get back to where we were, we got to start right now by getting this shot.
