Sophronia Wilson

I decided to get the COVID vaccine to keep from contracting the COVID virus, again. I've had it before, a mild case thank goodness, but I don't want to take a chance on getting it again and it's worse than what it was the first time.

The concerns for me about getting the vaccine: you're going to always have some type of side effect. You heard a lot of things because the rumor mill is great. You hear a lot of different things, but you try to go based on the data. Look at it. Look at the numbers.

So, just trust the science that's put out there. I'm glad that I got the vaccine because I don't want to be a spreader to my family. My parents are elderly, and I want to keep them as safe as possible.
